## *Siri*

Siri har en tung og varmelagrende kjerne av støpt olivinstein. Det gjør at varmen lagres i kakkellovnen og avgis opptil ett døgn etter at ilden har sluknet.

Siri 901 er en hvit kakkellovn med et smykke i kronen.

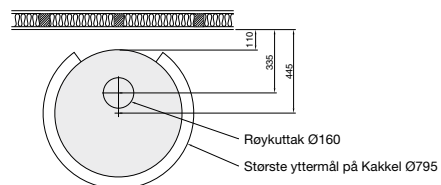

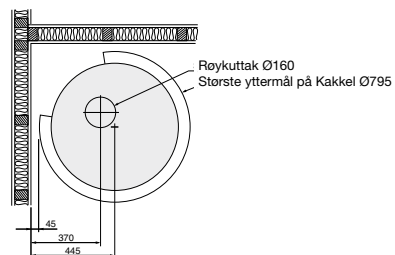

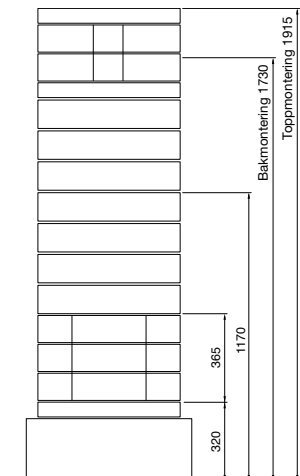

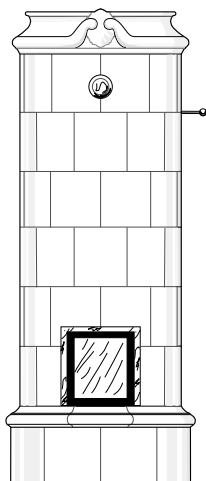

Siri 902 er en klassisk kakkellovn med rikt ornamentert kronkakkell.

Siri kan plasseres i hjørne eller mot en rett vegg. Det er vår minste kakkellovn som kun krever 0,5 m<sup>2</sup> gulvflate.
